

disclosed invention includes a flexible sheet of material 28 that can be folded for stowage. The flexible sheet of material 28 may include a window [[30]] 29 or be made of a material that allows the user to peer through, but does not allow the animal to see the user. These one-way see through fabrics are well known, and many of these types of fabrics or films are discussed in U.S. Patent No. 6,254,711, which is incorporated herein in its entirety by reference. However, it is also contemplated that the concealing device 10 may include a window 29 that is a simple cut-out or a section made of a movable panel or of a sheer material.
